

Disaster Planning: A Key to Special Medical Needs (SMN) Sheltering

People living in the community who are medically fragile are especially vulnerable in times of disaster. This training is designed to assist communities in identifying persons with SMN and in developing or revising SMN Sheltering plans. Additionally, training will examine identification of stakeholders, sheltering options, and coordination of facility and day program plans with SMN Sheltering Plan.

Training is recommended for county SMN coordinators and community SMN stakeholders.
